AI Safety Research Fellow with Owain Evans | Astra Fellowship | *Constellation*

- Developed novel experimental framework to train and evaluate introspection in large language models (LLMs).
- Demonstrated that frontier LLMs (GPT-4, GPT-4o, Llama 3 70B) can acquire knowledge about themselves through introspection, not just from training data.

2023
Cambridge, MA

AI Research Scientist Intern | Cambria Labs

- Oversaw creation of multimodal video dataset for physical understanding and prediction.
- Built a data pipeline for data management & model training.
- Implemented and trained a suite of vision transformer based models on the dataset.
- Designed and conducted a number of experiments to evaluate dataset and models.

2023

Artificial General Intelligence Safety Fundamentals Course | BlueDot Impact

- Developed an evaluation protocol that isolates causal effects of context for analyzing steganographic tendencies (covert information encoding) in large language models.
- Conducted an investigation into potential steganographic behavior in current LLMs, utilizing the aforementioned evaluation protocol.

2017–2019
Berlin

Student Research Assistant | Berlin School of Mind & Brain
